Attention: Don Moody, President

Dear Mr. Moody,

As you might be aware, Enoc Torres, your Technical Service Representative, came to our plant this week (April 23 – April 26) to commission our machines, in addition to guiding us on our first production run.

It is my personal opinion, and that of my colleagues, that Mr. Torres is undoubtedly a first class professional. Through every step, his expertise and clarity of explanation has benefited our employee's greatly, and has left us with a thorough understanding of the commissioning and production process. In his own unique brand of teaching, he has inspired our employee's to achieve continuous improvement in their new professions, and since he left just yesterday, they are taking more responsibility as well as improving their production times. I do not think this achievement would have been possible without the assistance of Mr. Torres during his time with us.

It has been a great pleasure having him here as a representative of NuconSteel / Nucor Corporation, whom I view as a dedicated teammate in bringing our much needed products to the hands of consumers.

Please feel free to contact me anytime for anything you might need.

Sincerely Yours,

Moshe Y. (Jeff) Admon, B.Eng., B.A.
Plant Manager
