Dear Mike,

I want to take this opportunity to express my thanks to the entire Nucon team for the outstanding work and quality product that was produced for this project. The roof trusses were the best light gauge metal trusses I have worked with.

I would especially like to recognize the work of John Crocker and Ken Harrison.

The work that John put in to the design and then the redesigning of those trusses, (sometimes even for a third time), to accommodate the large amounts of mechanical work concealed inside, was a true test of skill and at times, patience. It is amazing to me what John was able to produce while being in Denton and looking at a very bad and incomplete set of drawings. His workmanship and dedication to the project was outstanding!

On this project, while our roof framing crew was a quality bunch of guys, they were very inexperienced when it came to pre-fabricated roof trusses. Ken was always available to us no matter what part of the country he happened to be in. Thanks to Ken's field knowledge, help, and "can-do" attitude, we were able to produce a quality product within budget.

Please let your team know how much I appreciated having Nucon as a partner to Brady Co. here at The Grand Del Mar Hotel & Spa. I look forward to working with Nucon on more projects in the future.

Thanks again.

Sincerely,

Joe Triolo
